

# MACS Project Wishlist 2020

- Clean walls and baseboards throughout building.
- Install eyebolts into the floor in the Medical room, for the purpose of restraining dogs on leashes while giving vaccines/etc.
- Install bolt locks on the metal doors in the Medical room.
- Repair door latches and door closers on several interior doors.
- Construct a divider wall in the Education Room.
- Remediate mold throughout the building.
- Wrap HVAC ducts to stop condensation and water damage to ceiling tiles.
- Replace ceiling tiles.
- Replace tube light bulbs throughout the building, including above the kennels (approx. 30ft ceiling height). Clean dust from the high ceiling.
- Install sound-absorbing acoustic panels in the kennel rooms.
- Paint west hallway walls and floor.
- Install smooth white wall paneling in cat areas, west hallway, medroom, etc.
- Construct pvc board or plexiglass cage dividers, to prevent transmission of disease between cages.
- Construct pvc board cat cubicles, and litterbox cover for Kitty City free-roaming rooms.
- Paint wooden cage stand shelves with Kilz.
- Repair/replace downspouts.
- Excavate ground on the west side of the building and install large rock, to stop flooding from coming inside.
- Clean out and repair outside Catio.
- Remove old solitary cell doors (3) and replace with tempered-glass doors.
